Canon

Hemodynamic monitoring &
reporting system

Alphenix

with QMAPP® integration

Alphenix with QMAPP® integration

Optimise your cathlab workflow.

High-end technology combined with unrivalled ease of use. Your cathlab, your workflow will be more efficient. With a system that grows along with your needs: QMAPP, hemodynamic monitoring and more.

SMART HARDWARE

Small device. Big data.

The QMAPP amplifier is no larger than a ream of office paper. In addition to monitoring all vital functions, it has 32 bipolar channels for recording the intracardiac ECG during electro-physiological exams.

Freedom of movement around your operating table

QMAPP connects with one single cable and fixates to a standard DIN-rail on the X-ray or operating table. This small but powerful device takes up little space which increases operational space and freedom of movement at the lab.

Easy interchangeable

QMAPP amplifiers are interchangeable by disconnecting the cable, without loss of patient or exam data.

No forced cooling

QMAPP amplifier does not need forced cooling (through a noisy ventilator) and so it does not cause any airflow.

SMART SOFTWARE

QMAPP Reporting Module: all relevant information at your fingertips

Excellent hardware, smart software

The QMAPP Reporting Module provides you with all the relevant information you need to make decisions. It handles all the recording, integration, analysis and reporting of clinical processes.

Connects and integrates with everything in your lab, improving your workflow

Thanks to all relevant connection, you can integrate QMAPP even further into your department's workflow. QMAPP uses standards like HL7 and DICOM. QMAPP registers used materials and implants using a barcode reader.

QMAPP provides vital alarms, so an imediate response can be facilitated for the wellbeing of your patient.

A module for every application

The core of the QMAPP Reporting Module is being able to collect data and connect to other systems and applications in your lab.

This modular design brings flexibility and efficiency to your workflow.

QMAPP provides all necessary parameters:

- Non Invasive Blood pressure
- Cardiac Output (Thermodilution)
- End tidal CO_2 (Side-stream)
- Up to 2 Temperature Channels (Body temperature)
- SpO_2 Nellcor
- Up to 4 Invasive Blood pressures
- 12 Lead ECG
- Up to 32 EP Channels
- Integrated FFR

QMAPP is manufactured by Fysicon B.V.

QMAPP®
So you can focus on the patient.

The Alphenix tablet improves the workflow by delivering more functionalities at the tip of operator finger's. Most functions of QMAPP can be operated directly on the tablet allowing you to focus on your patient.

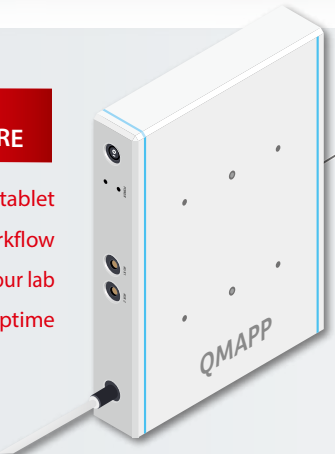
SMART SOFTWARE

Operated by Alphenix tablet

Integrated workflow

Connects and integrates with everything in your lab

Unparalleled uptime



SMART HARDWARE

No forced cooling

Connects with one single cable

Ultra compact amplifier
